Tree Report

RE: 3 Oak trees overhanging boundary of number 18 and number 23 .

This is a visual report on the current condition of the 3 Oak trees located at the above address (tree location clearly shown on map attached).

The inspection of the trees has been requested after they have put on considerable amounts of overhanging growth and dropping debris onto the driveway and cars below.

The trees are in good healthy condition with thick leaf cover over the extremities of the crowns. There is typical deadwood on the inner crowns which frequently drops onto the property. The trees span approximately 3 metres from the stem on the south west side, overhanging the boundary line.

Recommended works:

Partial reduction of crowns on south west side, leaving good growth points and shape but reducing overhang.

This is a visual report on the trees current situation; I accept no responsibility for the trees.

Kind Regards,

Nick Wilson
