Description of Works	Price
Large Ash tree in the centre of your back garden Crown reduce and reshape the trees entire canopy. This will involve a 40% to 50% reduction. (Height reduction of 5 metres) The final height and size to match the Field Maple tree next to it. This Ash tree will respond well to a heavy prune due to it nature. It will be close to a semi-pollard. I recommend this as it will help the field maple and give the Ash a new start in its confined space close to your house. All prunings to be removed.	

Total £540.00
inclusive

Tree works carried out to BS3998 and covered by £10 million Public & Product Liability Insurance

VAT No: 760 4147 46

This quotation is valid for 30 days from above date.
