Dear Nicky,
Thank you for your help with this matter.

Here is the additional information:

T1 - Maple - lower branches will be 2 - 3 mtr after reduction

T4 - Wild Plum - the lateral spread on the affected area will be about 3 mtr. Please see photo. Only the part of the tree overhanging the verge will be reduced.

T5 - Variegated Acer - the lateral spread on the southern side of the tree where it overhangs the garden will be 2 - 3 mtrs from trunk to tip.

I believe that none of the above trees were in situ in 1958.

With very best wishes

Bob Lock

Dear Mr Lock

Further to our telephone conversation, please find attached a copy of the letter sent on 13th October.

Kind Regards

Nicky
