Tree Report

Tree Location: Back garden of 25 Kingsway, Aldwick, Bognor Regis, PO21 4DH

Tree Species: T1,T2,T3 English Oaks

Estimated ages: T1:60 T2:15 T3:15

T1

This tree is in good health however it is beginning to over shade the garden, to increase light below giving other plants a chance at growing successfully I recommend reducing the trees canopy by 20%.

Current measurements from stem to extremities in meters... N:7 E:5 S:8 W:8 Height:18

Finished measurements from stem to extremities in meters... N:5.6 E:4 S:6.4 W:6.4 Height:14.4

T2

This tree is in good health; it is growing close to T1 and the two trees' canopies are growing together as one dome. To match the canopy with T1 I propose a 20% height reduction, its spread doesn't require pruning as the tree has grown straight up to reach the light.

Current measurements from stem to extremities in meters... N:1 E:2 S:1 W:0.5 Height:18

Finished measurements from stem to extremities in meters... N:1 E:2 S:1 W:0.5 Height:14.4

T3

This tree is situated east of T1 and T2, its top has died due to overshadowing and left the canopy unbalanced with one main limb growing to the south, to balance the tree I recommend reducing this southerly limb by 30%.

Current measurements from stem to extremities in meters... N:2 E:1 S:6 W:3 Height:15

Finished measurements from stem to extremities in meters... N:2 E:1 S:4.2 W:3 Height:15

All work will be carried out using correct target pruning techniques to insure healthy recoveries and keep the trees natural structures.

Kind regards, Luke Bentley.
