West Sussex

Dear Mrs Chapman PO21 4HT

Following my neighbours application to fell his Holm Oak, I have to say I would be quite happy to see this tree removed, it is also known as the "Mediteranean Weed" and is not a variety indigenous to this country, the tree can hardly be considered an amenity and only effects those living in 227 and 229, I doubt if anyone would notice or care if it was felled, It grows rapidly and the leaves don't break down and the tree itself casts a permanent dark shadow preventing other more worthwhile trees to flourish. Mr Wiggs has planted 10 - 20 trees on my western border of varying varieties, all of which I suspect being of a more appropriate species for this part of the U.K.

I hope you will reconsider my neighbours application to fell the Holm Oak as to put a TPO on a weed seems completely inappropriate especially in view of the number of trees recently planted in 227 not to mention the large number of trees planted by the management on the Aldwick Bay Estate.
