Dear Bob
I enclose the following recommendations to trees that you have brought to my attention.

- ① Young lime tree outside No 24 Kingsway
Lightly crown lift the lower canopy by 2 mtrs over the road only.
- ② White Poplar outside No 23 Kingsway
Remove the three lowest limbs approximately 20 to 25 cms in diameter. Also prune of the sacker growth.
- ③ Ash/pine tree outside No 35 Kingsway.
Reduce and reshape the entire tree by 2 to 2.5 mtrs all over. This tree will respond well to pruning.
- ④ 2x Sycamore trees within the grounds of No 47 Kingsway. Reduce to most southerly tree by 2 mtrs in height and reshape the easterly lateral spread. The smaller Sycamore on the west boundary can be reduced by 1 mtr as has been done in the past.
- ⑤ Golden Leylandi over the path outside 57 Kingsway. Fell and remove.

I hope the above recommendations are helpful

Regards
