The 5 trees to be removed are all on the applicants property and all save the Robinia are immature and of no particular horticultural value. The Robinia is of a size and position whereby it could affect the foundations of the existing garage and therefore is also proposed to be removed.

Other trees noted on the schedule are outside of the applicants control on land believed to be owned by the local authority and by virtue of their age are deemed to be covered by the blanket TPO in force in the area. However, they are of a species and position that will mean that their root systems will not be affected by the proposal.
