Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

T1 - Bay Laurel. – Crown reduction by 1-2m of height and lateral branching back to old pruning points, and prune back from buildings. To improve light penetration and maintain tree in current size and condition.

T2 & T3 – Cupressus. spp - Fell/remove. Both trees outgrowing their location and starting to block pathway.

T4 – Holm Oak - Crown reduction by 1.5-2.5m of height and lateral branching back to old pruning points. To improve light penetration and maintain tree in current size and condition.
