Discharge of Condition 3

Shortening of Entrance Pier / wall and rebuilding pier.

The proposal is to carefully demolish the right hand entrance pier and to shorten the wall on that side by half. The bricks will be cleaned and the best bricks will be set aside to be used to construct an identical pier complete with the stone sphere and the red clay tiles at high level.

It is not anticipated that any new bricks nor flint will be needed, but should that be the case, an appropriate and matching brick will be sourced. The mortar will be light grey to match existing.

The anticipated final look should look almost identical to the existing. Existing foundation will be utilised and the wall. We trust this will be acceptable.
