A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)

If YES, you are required to provide for:

#### *Subsidence*

A report by an engineer or surveyor, to include a description of damage, vegetation, monitoring data, soil, roots and repair proposals. Also a report from an arboriculturist to support the tree work proposals.

#### *Other structural damage (e.g. drains, walls and hard surfaces)*

Written technical evidence from an appropriate expert, including description of damage and possible solutions.

Our ref : TJMT

25 October 2012

Dear Mrs Smyth

Further to our meeting earlier today, I am writing to confirm my recommendations and advice as follows:-

1. Looking down the drive, the cherry tree on the right is a *Prunus Kanzan*. It is showing its age. It is not a long-lived tree, and it is coming to the end of its days.
2. The conifer on the right-hand side in between the rhododendrons is a *Chamaecyparis Boulevard*. Again, this is coming to the end of its life. I would recommend replacing both trees with *Liquidambar Worplesdon*.
3. The area beyond the small Oak tree – I would suggest that when the digger is on site, a test hole is dug to see whether there is a decaying stump under all the fungi. If there is, I would recommend you consider building an earth bank 3' high and 4'-5' wide sloping. This will give a planting area to provide screening. I would recommend planting 2 *Photinia Red Robins*.
4. Tree with graft reversion – this tree has reverted to common stock. It will not grow into a specimen tree as the graft has died.
5. *Leylandii* and *Macrocarpa* mix hedge – I would suggest planting 2 *Prunus Laurocerasus* to fill the gap.
6. Front garden – right side screening – nine fence panels. There is an existing *Laurus Nobilis*. I would suggest a further 11 *Laurus Nobilis*.
7. Back garden – looking to rear fence – right hand side. There are 11 *Laurus Nobilis* going onto the shaded area. I would recommend planting 20 *Prunus Laurocerasus* to run along the side and rear and side of the shed.

../2

8. Back fence – with the Leylandii removed, I would recommend 18 Laurels to create a hedge with a mixed tree planting to gain extra height, staggered in front of the Laurels. I would suggest planting Quercus Ilex and Photinia Red Robin standards.
9. Left side – I would suggest 9 Laurus Nobilis.

I hope my recommendations provide you with all the information you require. However, should you have any queries, or require further advice, please do not hesitate to contact me.

I enclose my site visit fee for £80.00 for your kind attention.

~~I look forward to hearing from you.~~

Yours sincerely

T.J.M. TEEAR
