Dear Bob

Recommended Tree Works on Craigweil Private Estate T1: Wingnut and T2: Mature English Oak with structural damage from the Bin Lorry.

Further to my visit in September to look at two trees on your estate (T1, The Wingnut tree on the north verge, outside Mr & Mrs Grey's house and T2, Mature English Oak outside Mrs Freazer's house, I recommend the following.

T1 : This Wingnut Tree (Peterocarya).

This tree is in full vigour, as is the nature of this species. The tree has been reduced and shaped in the past and the tree has responded well. I recommend this crown reduction of approximately 1.5 meters all over, is carried out again this winter.

T2 : Mature English Oak.

This tree has been repeatedly hit by the bin lorry. There is extensive structural damage to this tree. I recommend the major limb with the damage is removed and the remainder of this tree reduced by approximately 2meters. All major dead wood can be removed during these pruning works.

The above works have been recommended firstly on health and safety grounds and secondly based on my view of good tree management, taking into account the usual verge side environment and its influences. If you require more details they will gladly be provided.

John Bentley NDARB
