Hi Kathryn

Hopefully I can answers the questions about this application

Most of the trees on site are self set Sycamores which just require cutting back as they are encroaching on the garden area The oak I believe is probably pre 1958 but the rest are not

I can't really give finished spread dimensions as the crowns merge with each other but I can give the direction of the cuts as follows

T1-8 sycamores west facing sides
T 9 chestnut. West side
T10 sycamore west side
T11 Field Maple south and west side
T 12-13-14 sycamores south side
T 15 oak south side
T16 chestnut south side
T17-18 sycamore south side
T 19-32 sycamores east side
T33 birch east side
T 34-38 East side

Hope this clarifies things

Thanks
Richard Sinclair
