25th Sept 2017

Dear Bob

Tree Works on Craigwell Private Estate Sept 2017

Further to my visit, I am pleased to provide the following recommendations for the tree works.

- 1, **Dead/Dying Maple outside Property no. 44 Kingsway.** This tree is close to dying and needs felling.
- 2, **Dead Cherry tree outside no. 40 Kingsway.** Fell
- 3, **Two semi mature trees either side the Drive way of Brus Lodge Kingsway.** one is a Magnolia and the other is a liquid Amber. The two trees need crown lifting to help with the visual splay when leaving this drive. This will require removing approximately four to Five of the lowest branches on each of the two trees.
- 4, **White Poplar tree outside No 25 Kingsway.** Prune off the sucker growth on the trees main stem.
- 5, **Mature Horse Chestnuts down Queens way.** There are dead branches throughout these trees Canopy's. the largest tree on the corner of Queens way and Kings way has die back in the upper canopy. Where there is dead wood exceeding 50mm in Diameter, this should be removed.
On the Horse Chestnut directly outside Property No. 43 Queensway, I recommend the easterly growth growing towards the property is pruned back as has been done before by approximately 2 mtrs. There is also a branch with a very weak union around 3 Mtrs up on the main trunk on the east side. This branch continues up through the trees canopy. I am concerned that this branch may fail in winds, due to the weak union. I recommend it is reduced by approximately 3 to 4 meters.
- 6, **Malus on the east verge of Wychwood close just south of the roundabout.** Due to the split in the main trunk which occurred as a result of Lorry damage I recommend this tree can be reduced by approximately 1.5 meters.

The above works have been recommended firstly on health and safety grounds and secondly based on my view of good tree management, taking into account the usual verge side environment and its influences. If you require more details they will gladly be provided.

Yours

John Bentley NDARB
