I am happy to mark up a photograph but this too can be very misleading depending on the angle that the photo has been taken and I suggest that the best course of action would be to grant approval on the basis of 3m to 4m and the proviso that I meet up with Mr Smythe and his tree surgeon on site before he starts work so that the tree surgeon can put tape around the branches at the points of intended severance?

This would also give the tree surgeon chance to probe the decay point whilst I am there just in case we have to agree to felling on safety grounds!! [see my notes].

Regards,

Bernie Harverson
