Dear Mr Davis,

Thank you for your recent e mail. We have arranged for the joinery company to supply some section drawings of the windows as requested and we are in the process of looking at an alternative slate for the roof. We will now opt for something that closely matches the roof of the house and is of a natural material.

As soon as we have received these items I will drop them off at your office.

Kind regards

Lorraine Musa

Dear Mr and Mrs Musa,

I have now received the following comments from our Conservation Officer in respect of your condition discharge application.

Therefore, I will require alternative sample of the slate as well as scaled drawings/sections of the proposed windows.

Kind Regards

Simon J Davis MRTPI | Principal Planning Officer, Planning Department, Directorate of Place, Arun District Council |

AW/331/18/DOC

The current application relates to two conditions applied to AW/187/18/PL and relates to the provision of:

- A schedule of materials and finishes and samples of such materials and finishes to be used for external walls and roofs of the proposed extension
- Details of the construction and materials of all new joinery (windows & doors) have been submitted to and approved by the Local Planning Authority

The schedule of proposed materials generally appears to be acceptable. However, I have some concerns regarding the proposed roofing material. Whilst I support the use of recycled materials, the sample provided does appear to look man made, with a more regular appearance along with a glossy sheen. This is in contrast to traditional slate which has a more varied, yet dull appearance. At the moment, the slate cannot be supported.

With regard to the new joinery, I note that a list of materials has been provided, along with two photographs of similar doors/windows on the existing property. Reference to the use of hardwood is acceptable, as is the colour (white). However, as only two photographs have been provided, as opposed to some form of scaled drawing indicating measurements, it is not clear if the proposed windows will be a true like-for-like copy, or merely similar in appearance. It is considered that some greater certainty would be required.
