Dear Case Officer

I refer to the above referenced planning application and wish to register my objection.

The Ship Inn site in Aldwick Street has proved on two previous occasions that this change of use to a convenience store has failed and will again. Personally, it is a NO Convenience store.

The above reference specifically is for various signage. What I see proposed is glaring, ugly, not in keeping with the surroundings and hideous.

If you are familiar with the location you will have noted that this very treasured spot, with nature all around and the sound of the sea not too far away, cannot benefit from the proposal of the OneStop very much in-your-face visual distraction. The proposal is of such an imbalance to this area that it should not be passed and all efforts made to retain what we already have.

Likewise, the community has no need of a convenience store/supermarket with it's huge lorries, refrigerated deliveries, idling traffic and congestion which brings noise pollution and danger to pedestrians and cyclists alike. Delivery cages being rolled along are an unwelcome noise with no benefit to the wellbeing for those exposed to it all.

Regards
Judith Lynch.
