

Higher than the street light .
Overhanging the pavement and encroaching the highway.
Can grow to 30 metres.

Showing proximity to the manhole and the main drain into the Aldwick Road

Damage to the drive; picture does not show the amount of ground heave clearly but it is considerable.

Difficult to appreciate the dent in the road from this photo, but there is a significant dip with a lot of splashing from vehicles after rain.

Replant in the centre of garden away from the street light and manhole.

Grows into a round-headed, open, airy tree with slender stems. Green leaves are deeply-lobed and dissected. The leaves turn brilliant shades of yellow, orange, and red in autumn. A great shade tree. Excellent street tree.

Acer palmatum (Japanese Maple) grows to 5m (H) x 4m (W) in 10 years
