Hello again

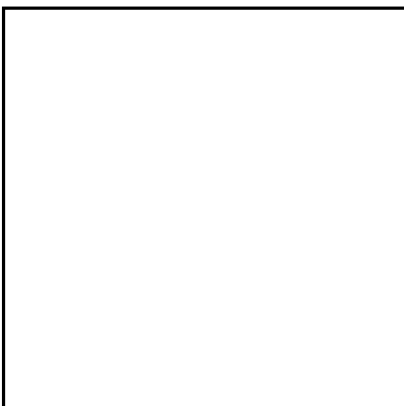

After further examination, we would estimate the trees in question to be approx 15m tall and with a spread of approx 9m wide.

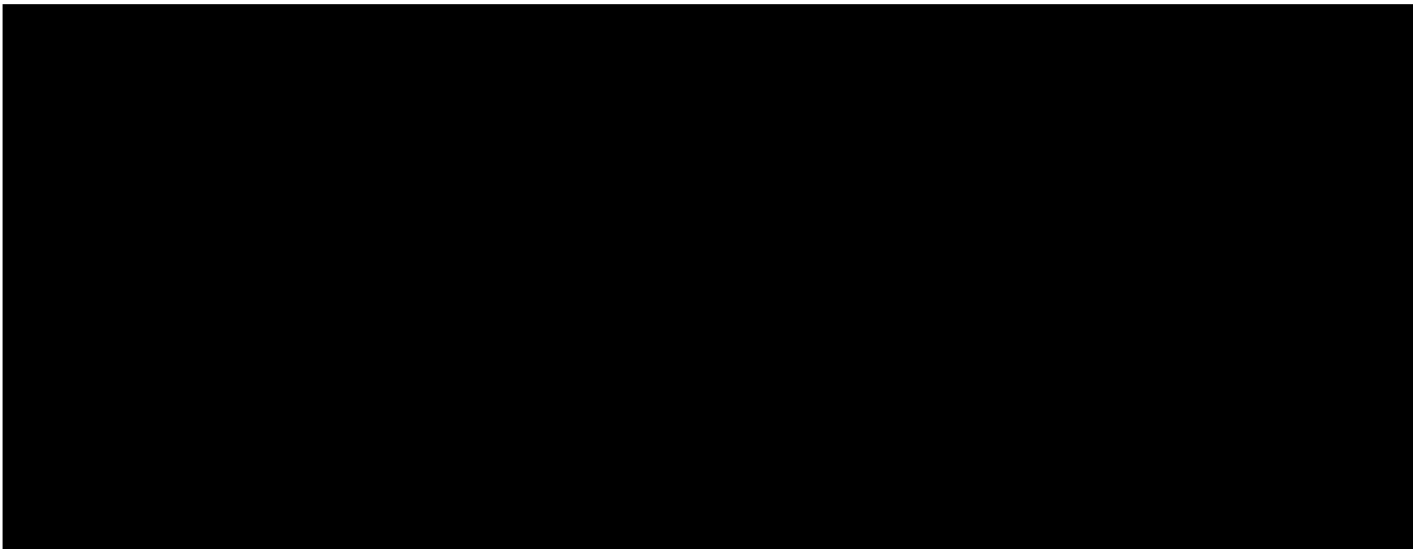

A reduction of approx 1-1.5m is proposed therefore leaving a height of approx 13.5m by 8m wide.

Please can you let me know if this information is sufficient in order to progress our application?

Many thanks and kind regards

Isabel Montrose

Hello and thank you for your response.

We do not think that the tree was in situ in 1958. We would estimate the age of the tree to be no more than 40 years old

giving it a planting date of not before 1980.

I hope that this is sufficient information for your purposes.

Kind regards

Izzy
