Dear Sirs

Planning Application AW/353/14/PL

Re. the above, I object on the following grounds:

- ① A white concrete rectangular shaped building contrasts badly with pitched-roofed houses of normal brick construction.
- ② Multi-ton vehicles carrying bricks etc. could damage the statutory undertakers plant beneath the road and footway surfaces
- ③ Access and exit from my home and most others could be compromised by parked vehicles, by dust and general upheaval.

May I suggest to the applicant that he keeps the existing shell of his house, reconstructs the interior and make provision for a Stairlift when required.

Carrying out all that would remove the prospect of an eyesore being built and indicate that the applicant has the best interests of his neighbours at heart, with minimising the disruption time to all.
Yours Faithfully
