To whom it may concern,

Thank you for your email 1/11/21 explaining that there are some unanswered questions about the proposed work on the oak tree which I am keen to resolve before you close the case. Nigel the tree surgeon was proposing a less radical pruning than previously proposed by the other tree surgeon. You ask for the proposed height and spread of the tree. Currently the tree at its highest its 10-15 meters. Nigel proposes little work to the height just enough to maintain its health. so the eventual height would be 10-12 meters. The current spread in meters is uneven approximately 9 meters and after the work its spread would be 7-8 meters. Would it be possible to organise the tree preservation officer to met with myself and Nigel. Can I also stress that we are very happy with the oak and just want to maintain its health.

Yours sincerely

Cynthia Weeks
