Tree survey at 9 Willow Way, Aldwick

See sketch plan

A group of trees on the southern boundary of 9 Willow Way, Aldwick Bay

The Eucalyptus has been reduced previously and has a compact crown which would benefit from a pruning cycle to reduce the risk of limb failure in the future.

The willow overhangs the verge and needs to be kept compact in its location

The yew is amongst a densely packed group and needs pruning to keep it separate

The Hawthorn is also amongst a group of trees and also needs pruning to keep its definition.

Yours Sincerely

Richard Sinclair
