You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Holm Oak (T1) - Reduce by 1.5 metres, removing any major deadwood and any dead limbs located throughout the canopy.

Goat Willow (T2) - Crown lift to achieve a 1-metre clearance between the lower canopy and the adjacent wall whilst removing any crossing and rubbing branches located throughout the canopy

White Poplar (T3) - Crown lift to achieve a 1-metre clearance between the lower canopy and the adjacent wall whilst removing any crossing and rubbing branches located throughout the canopy

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.
