Dear Bob

Thank you for getting me over to take a look at the Yew Tree in the front garden of Number 30 Wychwood Close on the Craigweil estate.

I report the following,

T1- Semi mature Yew Tree standing at approximately 4.5 Meters in height. This Yew has developed into a multi branch structured bush of a tree. The previous pruning works were carried out to provide a line of sight for when coming out of the driveway. My advice on managing this tree so that it is in keeping with the front gardens along Wychwood Close is the following - Reduce the height by approximately 1 meter and the width by approximately 0.6 to 0.8 of a Meter all around. This will leave the final height at around 3.5 meters and the final canopy spread at around 1.5 Meters. I also recommend the low growth up to 1.2 Meters is removed leaving a clear trunk.

The above works will pose very little stress on the tree. I hope it will help in maintaining this tree as a well-shaped evergreen structure. To keep a good shape, the yew will need annual trimming (topiary work). Please don't hesitate to get in touch if you have any questions.
