Attn Nicola Moore.

I am confirming the answer to your question requesting the crown reduction of the Beech tree AW/62/19/T in meters as a maximum of 2.5 metres off any branch. The diameter of the branch when cut would be in the region of 25mm diameter. The branches concerned are all long and slender and tend to break in strong winds as my conservatory already has had plastic roof damage when they fall.

I will give you a call to see if this mail has got though to you okay.

Thank you and regards

Roy Mawbey
