

Dear Sirs/Madam,

Further to our last application (Ref: AW/329/12/T) to maintain a Horse Chestnut tree that produces neither seed or flower, we seek permission to once again reduce the crown, weak and broken branches and suckers to just below previous pollard points with a view to promoting more healthy growth.

There will be no burning of materials on site or land adjoining.

The same care will be carried out so as to comply with BS3998: Recommendations for Tree Work.

It is anticipated that the work will commence in early July when the leaves will be infested with leaf miner and the subsequent reduction in insect numbers should allow for a better recovery next year.

We are aware of the provisions appertaining under Part 1 of the Wildlife and Countryside Act 1981 and although no nests have ever been seen in this tree, a full inspection will be carried out before commencement of any works. This will
