Tree Survey:

T1: Quercus Robur - Pedunculate Oak.

Height: 15m.
Radial spread: 5m.
Age class: Early-mature.

Remedial works required:

Proposed Works:

Crown reduction to the previous points to a height of 13 metres and a radial spread of 4 metres.

Reasoning:

The tree has previously undergone several crown reductions, to achieve a reasonable degree of structural integrity appropriate for its location; remedial pruning is now required to manage regrowth. Ongoing maintenance is essential to ensure the tree's long-term health and safety while preserving its significant amenity contribution to the local landscape.

Yours sincerely

Chris Matthews

All works are carried out in accordance with BS3998:2010 recommendations for tree work. We maintain public liability insurance up to £5 million. Please note that Conservation Area Planning rules or Tree Preservation Orders (TPOs) may be applicable to some trees, requiring local authority consent. We always verify the absence of restrictions prior to commencing any work. If planning permission is necessary, please allow up to eight weeks for a decision.
