Dear Mr Castro-Parker

This is not an Objection at the moment, I simply ask for clarification.

I refer to the above Application where I made an Objection to the original details.
Since then, Substitute plans have been posted and I remain concerned at the impact these still have upon the Craigweil House Conservation Area.
The Conservation Area Advisory Committee were also concerned at the initial Application and I am writing to seek that they again review the new submissions. I would also hope the Conservation Area Officer Mr White would also have considered views on the matter. Although the property is not within the Conservation Area, its appearance into and out of it are of paramount importance as contained in the current District Plan and the NPPF.
As the Parish has Objected again, local opinions are strongly in favour of resisting over-sized development in restricted spaces, especially here where the spacious planning of this estate has always been an essential part of development. All the appraisals of the CA have emphasized this traditional quality within the area. Please will you advise me that the responsible parties above will be consulted and that their further remarks will be recorded on the web site well in advance of submissions closure.

Many thanks
Ian Jefferies
Deputy Chairman, CHECAA, (Craigweil House & Its Environs Conservation Area Association)
