Dear Glyn

I report on your Lawson conifer and Bay tree situated in your rear garden.

Following my visit, to inspect the two trees, I can confirm the following.

I recommend that the Bay tree and Lawson conifer, can be reduced in height to allow more southerly light into your garden. Both trees have been previously topped some years back. To maintain heath in both trees, it would be wise to remove no more than 1.5 Meters in height. This will leave them at a final height of approximately 3.5 to 4 meters. This work can be done in the summer months if there are no birds nesting.

I hope the above is of help. If you require more details they will gladly be provided.
