Tree Report

Re: Sycamore on front driveway of #15 Acorn End.

Visual report on the tree from a Tree surgeon.

The tree is approximately 30ft tall with a balanced crown, the stem has a slight lean towards the property.

A large open split in the stem shows a vast area of decayed heart wood inside.

The opposite side of the stem has an old pruning wound that has rotted back into the integral structure.

Knocking tests and a bore tests through the open wounds prove the extent of the rot.

With growing concern from all neighbours and the home owner they have asked us to submit an application for felling and replanting.

Regards,

Nick Wilson,
