

Planning Officer: Miss Z Toppin

Planning Application Ref: **AW/9/21/T**

Location: **5 Aldwick Gardens, Aldwick, PO21 3QT**

Description of works: **To reduce the crown of 1no. oak tree to 9m tall with a spread of 6m**

Reasons given: Cyclical maintenance pruning

Comments on Application:

Pedunculate oak / *Quercus robur* Height: 10-15m Radial spread: 5-10m Age class: Early mature

- I have considered this application by means of a desktop review, using the information and plans submitted as well as online resources.
- This tree appears to be in a fine physiological state (and assumed to be so in the absence of any information/evidence provided to the contrary). It has been subject to heavy crown reduction work previously and appears to have responded with vigour.
- Growing at the rear of the property it is visible from surrounding properties and in part from publicly accessible land.
- Repeat operations such as now being asked for by the applicant will continue be necessary throughout the remaining lifespan of this tree, to achieve a reasonable degree of structural integrity appropriate for its location.

Conclusions:

- The proposal to reduce its overall height and spread with a view to restricting its growth is justified and consistent with previous works approved by the Local Planning Authority.
- While a temporary loss of aesthetic value is inevitable, satisfactory canopy renewal and recovery should occur if the work is undertaken to a high standard and at an appropriate time of year.

Recommendation:

- I recommend **CONSENT** for this application, subject to the following condition:

Condition to Be Applied to Approved Work: -

- Part a) Where whole branches are to be removed and final cuts made close to the trunk or branch union they are to be made as shown in Figure 2 of BS3998:2010
- Part b) Where branches are to be shortened back the final cuts are to be made at the correct angle shown in BS3998:2010 and adjacent to a live bud or lateral.
- Part c) The removal of crown material which has developed since the last operation must be done sympathetically and with respect to established 'knuckles' so as not to extend beyond the point of origin.

Reasons: In the interests of the trees continued health and vitality and to accord with current industry guidelines and sound arboricultural practice.

- *See also the standard pruning guidance notes issued with the consent letter*

Informative:

- The long-term vitality of this tree is best respected when significant pruning work such as proposed, is undertaken during the late spring to summer period (May to August). The work proposed should only be undertaken during this period.

Mark Warwick
Tree Officer / Parks and Greenspace Team
