

Application No: A/109/20/RES

The preservation of the significance of the archaeological interest that this site contains will be secured through the condition applied to A/99/17/OUT as outlined in the WSI approved in A/28/20/DOC. This will involve further evaluation of some areas and second stage investigation of concentrations of features such as the settlement in the southern part of the site, followed by appropriate publication of the results.
