For the attention of Michael Eastman

3rd December, 2020

Dear Sirs,

Ref: A/109/20/RES Land South of Water Lane, Angmering

This letter should not be just read and then filed as an objection to the above planning application. It is merely an enquiry into the scope and results of the archaeological surveys carried out by the Cotswold Group. Therefore I would expect to receive detailed answers to my two specific questions and ask that copies of both this letter and your response are posted on the planning portal.

I have watched with interest the antics of the Cotswold people taking place in the field adjoining my property. However, I should like your guidance on how to see a copy of the report on their findings or lack of them. Nothing seems to have been posted on your website and I have been unable to trace anything on the Cotswold website. Can you please supply me with a copy of their report? As my wife and I are self-isolating wherever possible we do not wish to go to libraries or to the planning office.

I note with some concern that, whereas numerous trenches were dug in each of the fields to the north of The Spotted Cow and The Avenals, no exploration was carried out on the area to be used as the link-road. This seems strange and to be a serious omission as once under concrete there will be no record of anything that may have been of interest but has been buried for ever. May I therefore have your undertaking that this matter will be rectified and your confirmation that no work will be started on the link-road until a full survey has been carried out on that part of the site?

I look forward to receiving your specific replies to each of these queries.

T. H. Aucott
