

Application No: A/110/21/PL

Site Address: BMW House Chandlers Garage Ltd Water Lane Angmering BN16 4EH

Description of Works: Erection of retirement apartment with 20 No. 1 Bed flats & 13 No.2 Bed flats with communal facilities & car parking, erection of a retail store with car parking & associated highway works. This application affect the character & appearance of the Angmering Conservation area, affects the setting of listed buildings and is in CIL Zone 2 (Zero Rated) as other development.

Bats:

The lighting scheme for the site will need to take into consideration the presence of bats in the local area and the scheme should minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

We require that a bat brick is integrated into the building onsite facing south/south westerly positioned 3-5m above ground.

Hedgehogs:

Any brush piles, compost and debris piles on site could provide shelter areas and hibernation potential for hedgehogs. These piles must be removed outside of the hibernation period mid-October to mid-March inclusive. The piles must undergo soft demolition. A hedgehog nesting box should be installed within the site to provide future nesting areas for hedgehogs

As a precaution any trenches should be covered overnight, or a means of escape made available and any hazardous chemicals need to be suitably stored away so animals cannot access them.

Nesting Birds:

Any works to the trees or vegetation clearance on the site should only be undertaken outside of the bird breeding season which takes place between 1st March – 1st October. If works are required within this time an ecologist will need to check the site before any works take place (within 24 hours of any work).

We would like a bird box to be installed on the extension / and or tree within the garden of the property.

Biodiversity Net Gain:

In line with Policy ENV DM5 of the Arun District Local Plan information on Biodiversity Net Gain needs to be provided as part of the planning application prior to determination. Though some biodiversity enhancements have been recommended within the Ecological impact assessment with phase 2 bat survey (June 2021) further information is required demonstrating what will be included within the scheme. Examples of what we would be expecting to see include;

- Any trees removed should be replace at a ratio of 2:1
- Wildflower meadow planting used

- Filling any gaps in tree lines or hedgerows with native species
- Bat bricks / tiles are integrated into the buildings onsite facing south/south westerly positioned 3-5m above ground.
- Bird box to be installed on the buildings / and or tree within the garden of the property.
- Grassland areas managed to benefit reptiles.
- Log piles onsite
- We require that gaps are included at the bottom of the fences to allow movement of small mammals across the site
- two hedgehog nesting boxes included on the site
