Dear Mr Waller,

**Re: S278/38 Agreement – Pound Nursery, Roundstone Lane,
Angmering, West Sussex.
Technical Approval for Proposed Highway Works**

I confirm that the design of the proposed highways works is now satisfactory.
Accordingly I grant Technical Approval(*).

Approved drawings are: 22411/1262 Rev G, 22411/1261 Rev K.

To complete the agreement we require:

- 16 folded paper copies of the Agreement Drawing(s) and 2 copies of the supporting drawings
- An electronic copy of each drawing

Where WSCC standard details have been used in the design please ensure that drawings are provided to the contractor.

(*) Subject to the satisfactory completion of the outstanding items as conditioned within the legal agreement.

Where applicable please change drawing status to "Approved - For Construction"

Once we have received these I will instruct our Legal Services Unit to draft the Highway Agreement. May I remind all those concerned that no work on the public highway can commence until the highway agreement is in place and a pre-start meeting has been held

Order for Electrical Connections

As the works involve illuminated highway features that will require electrical connections to be supplied by the Energy Network Distribution Company please provide evidence that an order is in place for the works and details of installation

dates to demonstrate that the connections will be made at the appropriate stage in the construction programme.

Booking Roadspace

The Traffic Management Act places a responsibility on the County Council to manage the road network.

Please complete and submit (to our StreetworksTeam) the attached 'Notification of Works Form' for the purposes of booking road space.

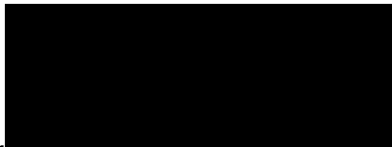

Failure to secure road space booking may result in a delay to your works commencing as we may have to instruct our Legal Services unit to insert a clause in the agreement requiring 3 months advance notification prior to works commencing

Securing a road space booking is not an authorisation to start work on site.

May I remind all those concerned that no work on the public highway can commence until the Agreement is in place and a pre-start meeting has been held. Note that there may be pre-start conditions within the agreement that will need to be discharged before commencement.

Please contact the Highway Inspector for your site will be confirmed once the legal agreement is drafted.

Yours sincerely,

Mark Akmenkains
Consultant
