Tree works schedule for Conservation Area V2

TG1 is a group of mixed species with Ivy group growing from Church House, the area is outgrown with overhanging of Holly Lodge. Proposal is to bring the group edge back under management by cutting back to boundary line from base to upper extent where necessary. Works are required to stop ingress of invasive species and bring the outgrown poor form under management. This group is formed of Four trees with 3 Elder Flower (A, C and D) and 1 Cypress (B).

TG2 is a group of mixed species trees with Macrocarpa, Maple, Cypress with early Ivy and vegetation encroachment, the group is growing from Church House, and outgrown with overhanging of Holly Lodge. Proposal to bring the group edge back under management removing defective parts from over Holly Lodge by cutting back to boundary line from base to upper extent where necessary. Works are required to improve the living environment of Holly Lodge and to stop ingress of undesirable species and bring the outgrown poor form under management. This group is formed of Five trees with 3 Cypress (E, F and I), 1 Norway Maple (G) and 1 Macrocarpa (H).
