

WEST SUSSEX COUNTY COUNCIL OWNERSHIP PARKING DEMAND TOOL

This parking demand tool has been compiled by West Sussex County Council. If you have queries relating to the information provided or require additional information please contact darryl.hemming@westsussex.gov.uk.

Please input the ward name for your development location below by double clicking in the box or click box and use the drop down menu to the right of the box. The spreadsheet will automatically show the District and Ward of this location. If the ward is not known please input postcode into the Ward Finder. The tool will allow input up to 3 wards in the boxes below. Please refer to notes for more details.

Ward 1	Angmering	
District	Arun	
Ward 2		
District		
Ward 3

J											
K											
L											
M											
N											
O											
P											
Q											
R											
S											
Total				1			3	0	0.02	0.20	3

Note:
No special provision need be made for visitors where at least half of the total parking associated with a development is unallocated. In other circumstances, it may be a good idea to make provision for additional demand for visitor parking of up to 0.2 spaces per dwelling.

In areas of parking constraint, levels of provision below predicted demand may be appropriate.

The tool is expressed as number of Rooms (Per Unit). If data is not available in the number of Bedrooms is used this will need to be converted. A general guide for conversion follows but may differ in some cases.

- Houses
- 1 bed = 3 rooms
2 bed = 4 rooms
3 bed = 5 rooms
4 bed = 6 rooms
5 bed = 7 rooms
- Flats
- Studio = 1 room
1 bed = 2 rooms
2 bed = 3 rooms
3 bed = 4 rooms
4 bed = 5 rooms
- Garages will count as 1 space when allocating spaces.

Ward data used can be checked by the user by referring to the District-Ward Data Tables highlight if the Census data does not include data for certain dwelling car ownership values have been obtained using the nearest sized dwelling with same ward. For example, if no data is available for a private house with 1 room then data for a house with 2 rooms has been used. The Car Ownership Data is highlighted in purple approach has been used. Where Census data contains small samples for certain streets highlighted in red if <20, and green if <50 in the Total Demand column. In such cases should be selected to achieve a higher sample size.
