

# BIODIVERSITY CHECKLIST

SEE ATTACHED PLANNING SUMMARY. ALTHOUGH SURVEYS HAVE NOT BEEN CARRIED OUT FOR THIS APPLICATION A SURVEY WAS CARRIED OUT TO SUPPORT APPLICATION A/77/16/PL WHICH WAS APPROVED IN JANUARY 2017. NO CHANGES TO THE SITE IN QUESTION SINCE THEN.

Please complete this form having regard to the Biodiversity Checklist Notes, which can be found at:

<http://www.arun.gov.uk/biodiversity-checklist>

**If you tick Yes, you must provide supporting information/statement with the application. If you do not the application will be held as invalid until you do so.**

**Site Address/Application Reference Number:**

RUSTINGTON GOLF CENTRE / OUT OF BOUNDS  
GOLFERS LANE, ANGERING BN16 4NB

## Bats

YES

NO

Has the site been surveyed for bats?

NO BUILDING ON APPLICATION SITE

☐
☒

Are there any structures on site which have the potential to support roosting bats?

☐
☒

Structures with high potential include all agricultural buildings, buildings with weather boarding, tunnels, mines, ice houses, bridges, cliff faces with crevices and woodland. Further guidance can be found in 'Bat Surveys: Good Practice Guidelines' available from [www.bats.org.uk](http://www.bats.org.uk) and the Bat Mitigation Guidelines available from:

<http://www.naturalengland.org.uk/ourwork/regulation/wildlife/species/bats.aspx>

Are there any trees on the site which have the potential to support roosting bats?\*

☐
☒

Trees with high potential to support roosting bats include old and veteran trees and any tree with cracks or crevices. Where appropriate, foraging and commuting routes should be incorporated into the design of the scheme. Further guidance can be found in 'Bat Surveys: Good Practice Guidelines'

NO TREES ON APPLICATION SITE

## Barn Owls

YES

NO

Has the site been surveyed for barn owls?\*

NO TREES ON OR ADJACENT TO  
APPLICATION SITE

☐
☒

Is there any evidence of barn owls nesting on or near the site or are there suitable nesting areas on the development site?\*

☐
☒

Barn owls often nest in farm buildings, dovecotes, bale stacks, hollow trees and a wide variety of derelict buildings. Barn owls require habitat which supports high number of small mammals including pasture, hedgerows and woodland. Further information can be found at <https://www.gov.uk/guidance/construction-near-protected-areas-and-wildlife>

## Breeding birds

YES

NO

Has the site been surveyed for breeding birds?\*

NO TREES ON OR ADJACENT  
TO APPLICATION SITE

☐
☒

Will areas of hedgerow/scrub/woodland/trees or other features likely to be used by nesting birds be affected by the proposal?\*

☐
☒

If 'Yes' then mitigation measures to ensure occupied nests are protected should be included with the application.

## Badgers

YES

NO

Has the site been surveyed for badgers?\*

APPLICATION SITE

☐
☒

Is there any evidence of badgers on or near the application site?\*

IS, MAINLY  
EXISTING CAR PARK

☐
☒

Are badgers commuting through the site to foraging areas?\*

☐
☒

Badgers use a wide variety of habitats and setts can be found in hedgerows, woodlands, scrub and field margins. Where appropriate, safe routes to foraging areas should be incorporated into the development proposals. Further information can be found in 'Badgers and Development' available at:

<http://www.naturalengland.org.uk/ourwork/regulation/wildlife/species/badgers.aspx>

Updated 11/05/16

|                                                                              |                                                               |                          |                                     |
|------------------------------------------------------------------------------|---------------------------------------------------------------|--------------------------|-------------------------------------|
| <b>Dormice</b>                                                               | Application site is mainly existing car park so very unlikely | YES                      | NO                                  |
| Has the site been surveyed for dormice?*                                     |                                                               | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Is there suitable habitat for dormice on, or close to the application site?* |                                                               | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Dormice are found in a variety of habitats including ancient semi-natural woodland, scrub, young plantations (both broadleaved and coniferous) and hedgerows. Occasionally they are recorded in gorse scrub, heathland and alder trees in reedbeds.

<https://www.gov.uk/guidance/hazel-dormice-protection-surveys-and-licences>

|                                                                                          |                                              |                          |                                     |
|------------------------------------------------------------------------------------------|----------------------------------------------|--------------------------|-------------------------------------|
| <b>Great crested newts</b>                                                               | Application site is mainly existing car park | YES                      | NO                                  |
| Has the site been surveyed for great crested newts?*                                     |                                              | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Is there suitable habitat for great crested newts on, or close to the application site?* |                                              | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Great crested newts are often recorded in ponds, reedbeds, ditches and mineral workings. Terrestrial habitat used by newts is varied and includes semi-natural grassland, woodland, hedgerows and pasture and are often found in urban sites including gardens. Further guidance on great crested newts can be found in the Great Crested Newt Mitigation Guidelines from:

<https://www.gov.uk/guidance/great-crested-newts-protection-surveys-and-licences>

|                                                      |                                              |                          |                                     |
|------------------------------------------------------|----------------------------------------------|--------------------------|-------------------------------------|
| <b>Reptiles</b>                                      | Application site is mainly existing car park | YES                      | NO                                  |
| Has the site been surveyed for reptiles?*            |                                              | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Is there suitable habitat on the site for reptiles?* |                                              | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Reptiles use a variety of habitats including rough grassland, heathland, allotments, scrub, brownfield sites, field margins and abandoned gardens. Further information can be found at:

<https://www.gov.uk/guidance/reptiles-protection-surveys-and-licences>

This checklist relates to :-

Application for a new outdoor climbing area with associated facilities and pre fabricated buildings together with 31 new car parking spaces, on land south east and close to the out of bounds building, Rushington Golf Centre, Golfers Lane, Angmering BNK 4NB

1st August 2020

Updated 11/05/16
