Arboricultural Report
For

Barley Combe
Ham Manor Way
Angmering
West Sussex
BN16 4JQ

Report Number : TR/24/08/11/Cloran

August 2011

Introduction

We have conducted an Ariel inspection and have compiled a tree report for:-

1 X Silver Maple tree in the garden of Barley Combe, Ham Manor Way, Angmering.

Tree Description

1 X Large silver Maple tree in the rear garden.

Tree condition

The main trunk of the tree is showing signs of sever basal ouse and after close inspection I have found the trunk of the tree to be rotten through. The upper canopy of the tree is showing good leaf coverage although there are numerous dead branches.

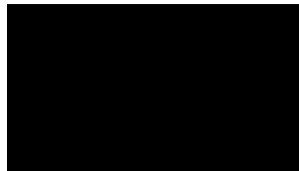

Recommendations

That the tree is felled and a replacement tree planted. The condition of the tree is such that I feel there is no practical way of making it safe by any other means. The weight in the canopy is such that the trunk is under enough pressure to fail under its own weight.

Arboricultural Excellence can take no liability for any future damage that the trees in this report may cause. We can only provide our professional opinion and recommendations.

I hope this meets with your approval and await your further instruction. If you have any further queries then please don't hesitate to call me.

Yours sincerely,

Rowan Mellor
