Subject: RE: A/146/18/PL - Construction of an end of terrace dwelling - 4 Gladstone Terrace, Angmering

Hi Anita

Considering the benefit of clearing the existing vegetation the demonstrated visibility is acceptable. Arguably, two cars could already park via the existing crossover and I do not consider that a severe increase in use of the access point would occur.

The proposals are therefore in line with paragraph 109 of the National Planning Policy Framework in that safe and suitable access can be provided for the development and there are no transport grounds to resist the proposal. I would advise that splays for both parking spaces are provided on a single plan, indicating splays from each driver position, details of which can be secured via condition.

Access

No part of the development shall be first occupied until such time as the vehicular access serving the development has been constructed in accordance with the details shown on the approved site plan.
Reason: In the interests of road safety.

Visibility (details required)

No part of the development shall be first occupied until visibility splays of 2.4 metres by 43 metres have been provided at the proposed site vehicular access, from each car parking space, onto Water Lane in accordance with plans and details to be submitted to and approved in writing by the Local Planning Authority. Once provided the splays shall thereafter be maintained and kept free of all obstructions over a height of 0.6 metre above adjoining carriageway level or as otherwise agreed.
Reason: In the interests of road safety.

Car parking space

No part of the development shall be first occupied until the car parking has been constructed in accordance with the approved site plan. These spaces shall thereafter be retained at all times for their designated purpose.

Reason: To provide car-parking space for the use

Cycle parking

No part of the development shall be first occupied until covered and secure cycle parking spaces have been provided in accordance with plans and details submitted to and approved by the Local Planning Authority.

Reason: To provide alternative travel options to the use of the car in accordance with current sustainable transport policies.

Construction plant and materials

No development shall be commenced until such time as plans and details have been submitted to and approved in writing by the Local Planning Authority showing the site set up during construction. This shall include details for all temporary contractors buildings, plant and stacks of materials, provision for the temporary parking of contractors vehicles and the loading and unloading of vehicles associated with the implementation of this development. Such provision once approved and implemented shall be retained throughout the period of construction.

Reason: To avoid undue congestion of the site and consequent obstruction to access.

INFORMATIVE

The applicant is advised that in addition to obtaining planning permission that they must also obtain formal approval from the highway authority to carry out the site access works on the public highway. The granting of planning permission does not guarantee that a vehicle crossover licence shall be granted. Additional information about the licence application process can be found at the following web page:

<https://www.westsussex.gov.uk/roads-and-travel/highway-licences/dropped-kerbs-or-crossovers-for-driveways-licence/>

Online applications can be made at the link below, alternatively please call [REDACTED]

<https://www.westsussex.gov.uk/roads-and-travel/highway-licences/dropped-kerbs-or-crossovers-for-driveways-licence/vehicle-crossover-dropped-kerb-construction-application-form/>

The applicant is advised that it is an offence to undertake any works within the highway prior to the agreement being in place.

Hi Katie,

Can you advise if the attached visibility would be acceptable for 2 spaces?

Thanks

Anita

Hi Anita

I have looked at moving the visibility splay to the centre of the north parking space and because of the curve of the road the splay still sits just outside the neighbours boundary fence, please see the attached drawing.

If you would prefer for me to still reduce the proposal to one parking space I would be happy to do so. However I would be keen to know if County Highways are happy with the attached as two off road parking spaces would be preferable.

Regards

Lauren

Hi Lauren,

Please see the comments below from County Highways.

Without prejudice I would suggest that the parking provision is amended to one on site space as per the comments below. Can you let me have revised plans accordingly?

Regards

Anita Gardner

Dear Anita,

Thank you for this additional information. Whilst visibility has been demonstrated from the centre of the access, I am mindful that two car parking spaces are proposed with no turn on site. If a car was reversing from the furthest east space then the splay indicated would not be achievable and I would be concerned that neighbouring boundary treatment outside of the applicants control would restrict visibility on to Water Lane. The applicant could amend the access and provide a single car parking space utilising the splays demonstrated to overcome this issue. I appreciate this will reduce the parking provision which you may wish to consider from an amenity aspect, though if demonstrated as suitable would overcome our highway safety concerns.

Hi Katie,
Further to your earlier comments on the above application please can you advise if the attached visibility details are acceptable?
Regards
Anita

Dear Lauren,

I have started looking through the consultee responses on your application and note that County Highways have requested that the following comments are addressed and that they are then re-consulted.
"The existing crossover would require to be closed off and the kerb reinstated. Vehicular visibility has not been demonstrated for the new access point on to the classified public highway. Manual for Streets sets out a requirement for a stopping sight distance of 43m for vehicle speeds of 30mph. This should be taken from 2.4m back into the centre proposed access point and extend to the nearside carriageway edge in either direction. If the full splay cannot be achieved without passing through third party land then the applicant should demonstrate that the new access point is no worse than the existing by providing maximum achievable visibility splays for both and will assess the highway safety merits of the scheme on this basis."

I apologise that I had not brought this to your attention before and would be grateful for your agreement to a one month extension of time on the application until 01-03-2019 to allow for your response and re-consultation. Please can you confirm your agreement by return.

Regards

Anita Gardner
