Good morning

Please can you confirm that all the relevant information has now been submitted for the application to progress ?

Many thanks
Ben Burrell

I can confirm all of the above and T2 after pruning would still leave the tree at its same height and crown of around 30ft

Dear Mr Burrell,

So just to confirm;

T1 and T2 are both oaks

T1, closest to the building – is going to be cut back to the trunk, will this be to the North face as well?

T2, works to North Face - I really still need the measurement stating how much of the tree will be left after pruning.

Kind regards,

Kathryn Welch

Good afternoon

I can confirm both trees are oak . Tree 1 nearest the buildings after cutting would only leave the stem , not sure how clear the photo is but the tree has grown side ways making it a direct danger to the buildings .

Tree 2 I would like cut to my boundry fence , there is 2 stems to the tree one has fully grown over my property with many rotten branches . This equates to around 50% of the tree , it would be on the north face of the tree .

I was unable to reply to the email I received .

Thank you for your patients

kind Regards

Dear Mr Burrell,

As discussed please could you send me a further location plan to enable me to locate the site in question. If possible it would be helpful if you could mark the rough areas the trees are located in, as that would also be helpful.

I will then be able to progress the application through to the validation team.

Kind regards,

Kathryn Welch
