OWPC40114

The Arboricultural Impact Assessment and Method Statement includes an evaluation of the impact of the proposed development on the trees on the site.

Paragraph 2.7 of the report sets out the impact of the proposed removal of trees.

The report identifies that 10 trees would need to be felled. This includes trees in tree restriction categories B and C.

Category B trees are those trees capable of making a significant contribution to the area for more than 20 years and should not be felled for development purposes. Category C trees have an estimated life expectancy of at least 10 years.

Paragraph 2.7.4 of the report states:

"... the removal of 'B' category trees is not ideal",
and paragraph 2.7.7 states

"It is further acknowledged that all 'B' category trees specified for removal have value in their current context on the site frontage - however, given the proposed redevelopment of the site, their retention is not feasible..."

As the report says the removal of trees is not ideal. Trees should not be felled in order to build 76 houses and 201 car parking spaces. Trees absorb and store carbon dioxide, particularly useful when next to a busy road.

Your views as made above will be considered before the application is determined.
