Thank you for your internet representation made on 6th November 2021 which has been recorded as an objection with the comments as follows:

OWPC41674

Why are we proposing for houses to be again built on green land and not the brown land that the government have put forward when they were elected?

Our much needed farmland which is home to decreasing populations of lapwing/ green plover that breed and feed in and around these fields. Habitat loss is the main reason for this once thriving sussex bird.

Also how are we supposed to shop local and support British farming and contribute towards lowering emissions by reducing imported farm produce when local councils are always in favour of a quick and easy buck.

Farming and the land around us are a very important part of sussex life, not only providing great habitat for many wintering birds like thrush, redwing, fieldfare and for our wintering birds like the Buzzard which has been brought back from the brink of extinction in England since the 90's. These birds rely on worms as a main diet in the autumn/early winter months and without this farmland we will once again see numbers decline along with the kestrel which was again a common site along the suggested fields but is now declining due to habitat loss.

We should think really hard about the impact on nature and not just on the fact the infrastructure to support all these houses in Angmering and the surrounding area is just not functionable.

Your views as made above will be considered before the application is determined.
