Dear Cian, Neil

I am writing to you following discussions relating to both applications **A/15/13**; Water Lane, Angmering and **A/130/12**; Land South of the A259

Firstly following discussions relating to the design, layout and appearance of application **A/15/13** we formally wish to **Withdraw** this application.

Secondly, with regard to application **A/130/12** we have been asked to provide further information to the Council in respect of Highways Matters, further Landscape information and review of alternative sites (further site information sent to us in mid/late February). We discussed targeting the 15 March to provide this further information as Cian was going on leave and would like to target the 10 April Committee.

On the basis of the information required and timings for Committee we request that you allow further time to provide the required information to allow the application to be heard on 8 May. As you will appreciate, gaining responses from third parties in respect of land/data can take some time, however we will be able to provide this information to enable consideration at the 8 May Committee.

As the 10 April Meeting was already outside the 13 week determination period I would hope that as a matter of pragmatism you would allow us opportunity to provide this information to enable consideration on 8 May with a full suite of updated information and consultations responses. On such a scheme it would seem only reasonable to enable full consideration of all planning matters within this original submission.

I trust that this is acceptable, yet if you have any queries please call.

I look forward to hearing from you.
