Dear Emma,

I acknowledge receipt of the additional information and have reconsulted the Environmental Health officer and Environment Agency. Accordingly I would appreciate your agreement to an extension of time on the application until 28-10-2021 to allow time for responses to be received and processed.

Regards

Anita Gardner

Dear Anita/Juan

Further to the application submitted to discharge condition 18 of application A/114/18/PL.

I note in monitoring the application that your Environment Health Officer has raised some queries regarding the Supplementary Geo-environmental Investigation and Remediation Strategy prepared by Listers.

In response to the comments received, Listers have advised that whilst some exceedances have been noted against the generic screening criteria, it has derived site-specific screening criteria (SACs) which have shown that there are no exceedances so no remediation is considered to be necessary. Listers confirm that they included a sentence (noted below) within the report to confirm that in addition to deriving the SACs most of the Made Ground will be stripped or covered with hardstanding which further reduces the risk. As remediation measures aren't recommended it is not considered that this will require a specific remediation strategy.

"None of the soil contamination tests carried out as part of this investigation revealed elevated concentrations of contaminants in the soil when compared with the relevant SACs. In addition, site levels are due to be reduced and raised in order to bring site levels down to the level of Water Lane. As such the Made Ground soils are considered to be stripped from the site, almost completely, or covered as is the case of the Made Ground encountered in HA1. The remaining site will be predominantly covered with a building and car parking with limited areas of soft landscaping/communal gardens, no private gardens and no fruit trees or homegrown produce. As such there is considered to be no significant risk of significant harm to the above referenced long term exposure receptors."

I have copied in Kate Giddings to help speed up any response and if there are still queries do please contact me directly.

Juan – I understand Anita may be on a period of absence and I would be grateful if you could progress this if required.

Please do let me know if any further information is required and if I could please be updated on when we may expect a decision regarding the discharge of condition 18 this would be very much appreciated.

Kind regards
