Response to Planning Application

From: Arun District Council Greenspace
Date: 26 March 2020

Application ref: A/177/19/PL

Description: New building for storage or distribution, light industrial & office (Class B1/B8) & associated parking. This application is a Departure from the Development Plan & may affect a Public Right of Way.

Location: The Vinery Arundel Road Poling BN18 9PY

Determining Authority: Arun DC

Summary recommendation: I would recommend the submission of landscape detail to expand on the indicative already submitted, to include tree protection measures for the existing to be retained hedge.

I would recommend no landscape objection to the proposed development.

Comments

Relevant landscape designations:

The site is presently situated within a development of commercial outlets.

There are no physical, visual, historical or cultural links, protected landscapes, scheduled ancient monuments, listed buildings, conservation area or Historic Parks or Gardens associated with this site.

South Downs National Park to the north.

Response

The influence of the site upon the wider character area is restricted through low lying topography and limited intervening vegetation. It sits on the rural fringe of Poling in an area of existing commercial development

The NPPF para 124/127 relate to good design principles which equally apply to commercial development. The documents submitted show a small indicative landscape offer and a tree retention plan.

The site is generally devoid of trees and shrubs with the exception to the existing established leylandii hedge which will be in close proximity to the proposals. This will require protection particularly during the construction period if it is to be retained without damage.

Impact

The potential impact of the proposals could be blended into the surrounding environment with further thought given to the landscape offer and greening to counteract this.

Mitigation/requirements

Details of the proposed landscape provision as indicated should be submitted for approval. The opportunity to increase the biodiversity of the site and potential screen the proposals should also be considered. Any trees and shrubs specified should be at a size which allows instant impact, but which will establish and mature as the site develops.

Recommendation/Conclusion

I would recommend the submission of landscape detail to expand on the indicative already submitted, to include tree protection measures for the existing to be retained hedge.

I would recommend no landscape objection to the proposed development.
