1 west Drive Horse Chestnut tree

Mon, Oct 2, 2017 at 6:09 P M

Hi Kirstin

Further to our recent conversation I would recommend The Horse Chestnut in question be removed as it is suffering from die back to the top of the crown. Due to the condition of the tree with regards to the two large limbs that have died and dropped off without warning I believe it to be suffering from bleeding canker. As the tree has become visibly worse over the last year I would recommend removing it.

Many thanks

Anthony duffield
