Dear Zac,

Following our telephone conversation, please find attached a location plan with the closest possible postcode to the point of reference.

Acknowledging the need for a location and amount of the self-seeded Elms and Sycamore, these are now depicted on the plan as G1 located within the understorey of tree nos. 1-10 approximately and G28 located in the NE of the site and amongst some newly planted young trees.

I hope this information is enough to satisfy your request, and look forward to hearing from you regarding whether the self-seeded are included in the TPO. (I have also included the previous survey schedule and tree works spec) Please be aware that the contractors spec and our TS do not coincide with G1. Our G1 depicts off-site silver birch where are their G1 is the self-seeded elm within the understorey of T1-T10.

Look forward to hearing from you soon.

Kind regards,

Mike
