

Application for Outline Consent

DECISION NOTICE

Application Ref: A/227/21/OUT

1 To Addressee

ECE Planning Limited
Brooklyn Chambers
11 Goring Road
Worthing
BN12 4AP

2 Site Address

Wilmington
Arundel Road
Angmering
BN16 4ET

3 Description of Development

Outline application with all matters reserved (except access) for the erection of 7 no. residential dwellings, vehicular & pedestrian access, with all matters reserved except for access. This application is a Departure from the Development Plan (Countryside).

4 In pursuance of their powers under this Act and related Orders and Regulations the Council **PERMIT** this development to be carried out in accordance with the application and plans and subject to the following conditions.

- 1 The permission hereby granted is an outline permission under s92 of the Town and Country Planning Act 1990 (as amended) and an application for the approval of the Local Planning Authority to the following matters must be made not later than the expiration of 3 years beginning with the date of this permission:-

- (a) Layout;
- (b) Scale;
- (c) Appearance;
- (d) Landscaping.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

- 2 The development hereby permitted shall be begun either before the expiration of 5 years from the date of this permission, or before expiration of 2 years from the date of approval of the last of the reserved matters to be approved, whichever is the later.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

- 3 In respect of the site access and the number of dwellings only, the development hereby approved shall be carried out in accordance with the following approved plans:

- Site Block Plan (Drawing no. 003 Rev B)
- Illustrative Site Plan (Drawing no. 001 Rev D)

Reason: For the avoidance of doubt and in the interests of amenity and the environment in accordance with policies D SP1, D DM1, LAN DM1, QE SP1, T SP1 and T DM1 of the Arun Local Plan.

- 4 The details referred to in condition 1 for the residential units shall include a plan identifying a minimum of 30% of residential units to be provided as being to M4(2) Building Regulations standards (or any other successive standard). The development shall be undertaken in accordance with those details and retained as such at all times thereafter.

Reason: To ensure the provision of adaptable dwellings which meet the diverse needs of future occupiers, in accordance with the National Planning Policy Framework and policy D DM1 of the Arun Local Plan.

- 5 No development shall take place, including any works of demolition, until a Construction Management Plan has been submitted to, and approved in writing by, the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters:

- a) An indicative programme for carrying out of the works;
- b) Details of the arrangements for public engagement / consultation both prior to and continued liaison during the construction works;
- c) Measures to minimise the noise (including vibration) generated by the construction process to include hours of work, proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s);
- d) Details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination;
- e) The parking of vehicles of site operatives and visitors;
- f) Loading and unloading of plant and materials, including permitted times for deliveries;
- g) Storage of plant and materials used in constructing the development;
- h) The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
- i) The provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulations Orders);
- j) Measures to control the emission of dust and dirt during construction;
- k) A scheme for recycling / disposing of waste resulting from demolition and construction works i.e. no burning permitted.

Reason: To protect the amenity of local residents in accordance with Policies QE SP1, QE DM1, QE DM2 and QE DM3 of the Arun Local Plan. This planning condition is required to be pre-commencement to ensure an assessment of construction impacts from development and measures to mitigate impacts are secured prior to works commencing.

- 6 No construction / demolition activities shall take place, other than between 08:00 to 18:00 hours

(Monday to Friday) and 08:00 to 13:00 hours (Saturday) with no activities on Sunday or Bank Holidays.

In addition to these hours of working the Local Planning Authority may approve in writing a schedule of activities where it is necessary to conduct works outside the hours specific in this condition.

Reason: To protect the amenity of local residents in accordance with Policies QE SP1 and QE DM1 of the Arun Local Plan.

- 7 Prior to commencement of development, the following documents shall be submitted to and approved in writing by the Local Planning Authority:

1. Based on the Phase 2 Ground Condition Assessment and the additional Site Investigation Scheme and the detailed Phase 1

Risk Assessment, an Options Appraisal and Remediation Strategy giving full details of the remediation measures required and how they are to be undertaken.

2. A Verification Report providing details of the data that will be collected in order to demonstrate that the works set out in (1) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Note: Any changes to these components, (1) to (2) require the express written consent of the Local Planning Authority.

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and gas monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. The report shall also include a long-term monitoring and maintenance plan for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To protect the amenity of local and future occupants, in accordance with policy QE DM4 of the Arun Local Plan. This planning condition is required to be pre-commencement to ensure an assessment of land contamination and measures to mitigate impacts are secured prior to works commencing.

- 8 If during development, any visible contaminated or odorous material, (for example, asbestos containing material, stained soil, petrol / diesel / solvent odour, underground tanks or associated pipework) not previously identified, is found to be present at the site, no further development (unless otherwise expressly agreed in writing with the Local Planning Authority) shall be carried out until it has been fully investigated using suitably qualified independent consultant(s). The Local Planning Authority must be informed immediately of the nature and degree of the contamination present and a method statement detailing how the unsuspected contamination shall be dealt with must be prepared and submitted to the Local Planning Authority for approval in writing before being implemented. If no such contaminated material is identified during the development, a statement to this effect must be submitted in writing to the Local Planning Authority.

Reason: To protect the amenity of local and future residents in accordance with Policy QE DM4 of

the Arun Local Plan.

- 9 No development shall commence until an acoustic assessment has been undertaken to determine the impact of noise from transport related noise sources. The results of the assessment and details of a scheme of mitigation measures necessary to ensure an appropriate level of aural amenity within habitable rooms and amenity in garden areas shall be submitted and approved in writing by the Local Planning Authority. All works, which form part of the approved scheme, shall be completed before any part of the development is occupied and shall thereafter be maintained in accordance with the approved details.

Reason: To protect the amenity of local residents in accordance with Policy QE DM1 of the Arun Local Plan. This planning condition is required to be pre-commencement to ensure an assessment of noise impacts from development and measures to mitigate impacts are secured prior to works commencing.

- 10 No external lighting shall be installed until details have been submitted to and approved in writing by the Local Planning Authority. This submission shall include a layout plan with beam orientation and a schedule of light equipment proposed (luminaire type; mounting height; aiming angles and luminaire profiles). The approved scheme shall be installed, fully assessed by a competent individual when operational to ensure no light creep/bleed, maintained and operated in accordance with the approved details unless the Local Planning Authority gives its written consent to the variation.

Reason: To protect the appearance of the area/the environment and wildlife/local residents from light pollution in accordance with policies D SP1, D DM1, LAN DM1, QE SP1, QE DM2 and ENV DM5 of the Arun Local Plan. This planning condition is required to be pre-commencement to ensure an assessment of light impacts from development and measures to mitigate impacts are secured prior to works commencing.

- 11 No part of the development shall be first occupied until the vehicular access serving the development has been constructed in accordance with the details in the approved plans. Once provided, the new access shall be retained in working order at all times thereafter, unless otherwise agreed in writing with the Local Planning Authority.

Reason: In the interests of highways safety, in accordance with the National Planning Policy Framework (2021) and policies T SP1 and T DM1 of the Arun Local Plan.

- 12 Development shall not commence until details of a proposed foul drainage system (including details of its siting, design and subsequent management / maintenance) have been submitted to and approved in writing by the Local Planning Authority in consultation with Southern Water. No dwelling shall be first occupied until works for the disposal of sewage have been fully implemented in accordance with the approved details.

Reason: To ensure that the proposed development has a satisfactory means of disposing of foul sewerage in accordance with policies W DM1 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to secure details of the foul drainage system prior to commencing any building works.

- 13 Development shall not commence, other than works of site survey and investigation, until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building shall be first occupied until the complete surface water drainage

system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to secure details of the surface water drainage system prior to commencing any building works.

- 14 The development shall not proceed until details have been submitted to and approved in writing by the Local Planning Authority for any proposals: to discharge flows to watercourses; or for the culverting, diversion, infilling or obstruction of any watercourse on or adjacent to the site. Any discharge to a watercourse must be at a rate no greater than the pre-development run-off values and in accordance with current policies. No construction is permitted, which will restrict current and future landowners from undertaking their riparian maintenance responsibilities in respect to any watercourse or culvert on or adjacent to the site.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. And to ensure that the duties and responsibilities, as required under the Land Drainage Act 1991, and amended by the Flood and Water Management Act 2010, can be fulfilled without additional impediment following the development completion. It is considered necessary for this to be a pre-commencement condition to protect existing watercourses prior to the construction commencing.

- 15 Development shall not commence until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include details of financial management and arrangements for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner or management company shall strictly adhere to and implement the recommendations contained within the manual.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the future maintenance and funding arrangements for the surface water disposal scheme are agreed before construction commences.

- 16 The ecological mitigation measures detailed in Section 4 of the Ecological Mitigation and Enhancement Strategy (EMES) prepared by CSA Environmental and dated October 2021 must be implemented in full and in strict accordance with these measures set out in Section 4 of the EMES.

Reason: To ensure that protected species and wildlife is adequately protected, in accordance with the National Planning Policy Framework, the relevant legislation and policy ENV DM5 of the Arun Local Plan.

- 17 The biodiversity enhancements detailed in Section 5 of the Ecological Mitigation and Enhancement Strategy (EMES) and the Biodiversity Net Gain Assessment prepared by CSA Environmental and dated October 2021 must be implemented in full.

Reason: To ensure that the development results in a net gain in biodiversity, in accordance with the National Planning Policy Framework, the Environment Act, and policy ENV DM5 of the Arun Local Plan.

- 18 During the monitoring period of the site, any damaged bat or dormouse boxes will need to be replaced in a timely fashion within this monitoring period.

Reason: To ensure that protected species and wildlife is adequately protected, in accordance with the National Planning Policy Framework, the relevant legislation and policy ENV DM5 of the Arun Local Plan.

- 19 No development shall take place until a Construction Environmental Management Plan (CEMP) and Landscape and Management Plan (LEMP) providing full details on how the habitats and enhancements onsite will be managed during the construction phase and post construction has been submitted to and approved in writing by the Local Planning Authority. These details shall then be implemented and adhered to in strict accordance with the approved documents.

Reason: To ensure that protected species and wildlife is adequately protected, in accordance with the National Planning Policy Framework, the relevant legislation and policy ENV DM5 of the Arun Local Plan.

- 20 Any works to the trees or vegetation clearance on the site shall be undertaken outside of the bird breeding season which takes place between 1st March - 1st October. If works are required within this time a suitably qualified ecologist shall survey the site for the presence of birds prior to any works taking place (within 24 hours of any work).

Reason: To protect local wildlife and protected species, in accordance with the relevant legislation and policy ENV DM5 of the Arun Local Plan.

- 21 The submission of the reserved matters application (s) relating to layout and/or landscaping, shall include an Arboricultural Impact Assessment (AIA) to include a 'Tree Survey Schedule', a 'Root Protection Area (RPA) Schedule' and a 'Tree Constraints Plan', and an Arboricultural Method Statement (AMS) to include a Tree Protection Plan. The Tree Protection Plan shall comply with the recommendations of BS5837:2012. These documents shall be submitted to and approved in writing prior to commencement of development and the works thereafter undertaken in strict accordance with these approved documents.

Reason: In the interests of visual amenity and the protection of the natural environment, in accordance with the relevant British Standards and policy ENV DM4 of the Arun Local Plan.

- 22 The submission of the reserved matters application (s) relating to landscaping, shall include a full Landscaping Strategy in respect of hard and soft landscaping and shall detail the species choice, position, densities and size at time of planting. This should be plotted in plan and list form and in relation to the trees and vegetation to be retained in the locale. These documents shall be submitted to and approved in writing prior to commencement of development and the works thereafter undertaken in strict accordance with these approved documents.

Reason: In the interests of visual amenity, landscape character and biodiversity, in accordance with policies D DM1, LAN DM1, and ENV DM5 of the Arun Local Plan.

- 23 At least 10% of the energy supply of the development shall be secured from decentralised and renewable or low carbon energy sources (as described in the glossary at Annex 2 of the NPPF) unless it can be demonstrated that a fabric-first approach would achieve an equivalent energy saving. Details and a timetable of how this is to be achieved, including details of physical works on site, shall be submitted to and approved in writing by the Local Planning Authority before any development above damp proof course (DPC) level begins. The development shall be implemented in accordance with the approved details and timetable and retained as operational thereafter, unless otherwise agreed in writing by the Local Planning Authority.

Reason: In order to secure on site renewable energy in accordance with national planning policy, and in accordance with Policy ECC SP2 of the Arun Local Plan.

- 24 Prior to the occupation of any part of the development, a strategy for the provision of the highest

available headline speed of broadband provision to future occupants of the site shall be submitted to and approved in writing by the Local Planning Authority. The strategy shall take into account the timetable for the delivery of 'superfast broadband' (defined as having a headline access speed of 24Mb or more) in the vicinity of the site (to the extent that such information is available). The strategy shall seek to ensure that upon occupation of a dwelling or commercial premises, the provision of the highest available headline speed of broadband service to that dwelling or commercial premises from a site-wide network is in place and provided as part of the initial highway works and in the construction of frontage thresholds to dwellings and commercial premises that abut the highway. Unless evidence is put forward and agreed in writing by the Local Planning Authority that technological advances for the provision of a broadband service for the majority of potential customers will no longer necessitate below ground infrastructure, the development of the site will continue in accordance with the approved strategy.

Reason: To safeguard the amenities of future residents in accordance with Arun Local Plan policy TEL SP1.

- 25 1) Prior to the commencement of the development details showing the proposed location of one fire hydrant or stored water supply (in accordance with the West Sussex Fire and Rescue Guidance Notes) shall be submitted to and approved in writing by the Local Planning Authority in consultation with West Sussex County Council's Fire and Rescue Service. These approvals shall not be unreasonably withheld or delayed.

2) Prior to the first occupation of any dwelling/unit forming part of the proposed development that they will at their own expense install the fire hydrant (or in a phased programme if a large development) in the approved location to BS 750 standards or stored water supply and arrange for their connection to a water supply which is appropriate in terms of both pressure and volume for the purposes of firefighting. The fire hydrant shall thereafter be maintained as part of the development by the water undertaker at the expense of the Fire and Rescue Service if adopted as part of the public mains supply (Fire Services Act 2004) or by the owner / occupier if the installation is retained as a private network.

As part of the Building Regulations 2004, adequate access for firefighting vehicles and equipment from the public highway must be available and may require additional works on or off site, particularly in very large developments. (BS5588 Part B 5) for further information please contact the Fire and Rescue Service. If a requirement for additional water supply is identified by the Fire and Rescue

Service and is subsequently not supplied, there is an increased risk for the Service to control a potential fire. It is therefore recommended that the hydrant condition is implemented.

Reason: In the interests of amenity and in accordance with policy INF SP1 and TSP1 of the Arun Local Plan 2011-2031 and in accordance with The Fire & Rescue Service Act 2004. This is necessary to be a pre-commencement condition as details of the fire hydrant or stored water supply need to be secured prior to construction works commencing.

INFORMATIVE: The applicant's attention is drawn to the requirements of the Environmental Protection Act 1990 and the Clean Air Act 1993 with regard to burning on site. A statutory nuisance may be caused by smoke and ash from fires or noise from the cutting or chipping of trees. In addition, air quality could be adversely affected on large projects. The granting of this planning permission does not permit a statutory nuisance to be caused. The Environment Agency should also be contacted regarding Exemption Permits to burn on site.

INFORMATIVE: The granting of this planning permission does not in any way indemnify against statutory nuisance action being taken should be substantiated complaints within the remit of the Environmental

Protection Act 1990 be received. For further information, please contact the Environmental Health Department on 01903 737755.

INFORMATIVE: The applicant is advised to enter into an S278 legal agreement with West Sussex County Council, as Highway Authority, to cover the off-site highway works. As part of these works it will also be necessary to apply for a street works license from the Street Works team (street.works@westsussex.gov.uk). The applicant is requested to contact The Implementation Team Leader (01243 642105) to commence the S278 process. The applicant is advised that it is an offence to undertake any works within the highway prior to the agreement being in place.

INFORMATIVE: Infiltration rates for soakage structures are to be based on percolation tests undertaken in the winter period and at the location and depth of the proposed structures. The percolation tests must be carried out in accordance with BRE365, CIRIA R156 or a similar approved method and cater for the 1 in 10 year storm event plus 40% on stored volumes/rainfall intensity (allowance for climate change) between the invert of the entry pipe to the soakaway, and the base of the structure. It must also have provision to ensure that there is capacity in the system to contain below ground level the 1 in 100 year storm event plus 40% on stored volumes/rainfall intensity. Adequate freeboard must be provided between the base of the soakaway structure and the highest recorded annual groundwater level identified in that location. Any SuDS or soakaway design must include adequate groundwater monitoring data to determine the highest winter groundwater table in support of the design. The applicant is advised to discuss the extent of groundwater monitoring with the Council's Engineers.

Supplementary guidance notes regarding surface water drainage are located at <https://www.arun.gov.uk/drainage-planning-consultations> on Arun District Council's website. A surface water drainage checklist is available on Arun District Council's website, this should be submitted with a Discharge of Conditions Application.

INFORMATIVE: Under Section 23 of the Land Drainage Act 1991 Land Drainage Consent must be sought from the Lead Local Flood Authority (West Sussex County Council), or its agent (Arun District Council land.drainage@arun.gov.uk), prior to starting any works (temporary or permanent) that affect the flow of water in an ordinary watercourse. Such works may include culverting, channel diversion, discharge of flows, connections, headwalls and the installation of trash screens. The development layout must take account of any existing watercourses (open or culverted) to ensure that future access for maintenance is not restricted. No development is permitted within 3m of the bank of an ordinary watercourse, or 3m of a culverted ordinary watercourse.

INFORMATIVE: It is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its ownership before any further works commence on site.

INFORMATIVE: If connection to the public sewer network is required then a formal application must be made to Southern Water. To make an application visit Southern Water's Get Connected service: developerservices.southernwater.co.uk and please read our New Connections Charging Arrangements documents which are available on our website via the following link: southernwater.co.uk/developing-building/connection-charging-arrangements.

INFORMATIVE: The impact of any works within the highway/access road on public apparatus shall be assessed and approved, in consultation with Southern Water, under a NRSWA enquiry in order to protect public apparatus. Please send these enquiries to: Developer.Services@southernwater.co.uk.

INFORMATIVE: For any works that may affect a Protected Species, it will be necessary to obtain a mitigation licence from Natural England.

INFORMATIVE: This permission conveys consent under planning legislation only and contravention with other legislation (e.g. protection of wildlife and statutory nuisance etc. should be considered).

INFORMATIVE: Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure)(England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations,

including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

Neil Crowther
Group Head of Planning

Case Officer: Ms Myer

Decision Issued: 14th January 2022

Arun District Council
The Arun Civic Centre
Maltravers Road
Littlehampton
West Sussex BN17 5LF

IT IS IMPORTANT THAT YOU READ THE NOTES ATTACHED TO THIS DOCUMENT

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.

If this is a decision on a planning application relating to the same or substantially the same land and development as is already the subject of an enforcement notice, and you want to appeal against this planning application decision, then you must do so within 28 days of the date of this notice.

If an enforcement notice is served relating to the same or substantially the same land and development as in your application and you want to appeal against this planning application decision, then you must do so within 28 days of the date of service of the enforcement notice, or within 6 months of the date of this notice, whichever period expires earlier.

Otherwise, if you want to appeal against this decision then you must do so within 6 months of the date of this notice.

Appeals must be using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at <http://acp.planninginspectorate.gov.uk>

The Secretary of State can allow a longer period for giving notice of an appeal but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.

If you intend to submit an appeal that you would like examined by inquiry then you must send notice to the Local Planning Authority and Planning Inspectorate(inquiryappeals@planninginspectorate.gov.uk) at least 10 days before submitting the appeal. Further details can be found at www.GOV.uk

PURCHASE NOTICES

If either the local planning authority or the Secretary of State refused permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances, the owner may serve a purchase notice on the Council (that is, where the land is situated in a National Park, the National Park authority for the Park, or in any other case the district council in whose area the land is situated). This notice will require the Council to purchase the owner's interest in the land in accordance with the provisions of Chapter 1 of Part VI of the Town & Country Planning Act 1990.

Please note that this decision notice only relates to matters under the Planning Acts and does not give consent under any other legislation that may apply to the development. You will need to carry out your own checks to determine whether any other consents or permissions are required. For example, the Building Regulations are likely to apply to most developments, and a Highways Licence may be required from West Sussex County Council for any development within the public highway (including the placing of skips on

highway land).
