Subject: Applications A/248/21/PL and A/256/21/RES Dappers Lane

CAUTION: This email originated from outside of the organisation. You should take extra care when clicking links or opening attachments - if you are unsure the content is safe contact the IT Helpdesk before clicking or opening.

Dear Mr Easton,

I am writing to express my serious concerns about the possibility of replacing the previously proposed mechanised barrier on application A/248/21/PL with an ANPR camera in application A/256/21/RES.

With the increased number of new houses being built on Dappers Lane we can expect a significant rise in the traffic using the lane. Human nature being what it is, many more drivers will no doubt be tempted to risk using an illegal route to minimise their journey times when entering and leaving Angmering. There needs to be a significant

deterrent to this. A mechanised barrier provides this far more effectively than an ANPR which suffers from potentially inadequate monitoring, failure to penalise infringements, vandalism or sheer indifference.

Those on foot, cycling or horse riding on Dappers Lane are at greatest risk. The new Highway Code seeks to protect such users from motorised vehicles by giving them priority in certain situations. A physical barrier is the best way to signal and achieve this.

I therefore object to the barrier being replaced with an ANPR due to the former's greater effectiveness and deterrence. I urge you to reject the application A/256/21/RES and stay with the the original proposal outlined in A/248/21/PL using a mechanised barrier.

Thank you for considering this objection.

Yours sincerely

Tony O'Connell
