Re. Application A/248/21/PL and Application A/256/21/RES

Dear David Easton,

I write concerning proposals that traffic flowing into Dappers Lane, from a new access road just south of Culberry Nursery, might be controlled by an APNR camera rather than by a mechanised barrier as originally implied (in Application A/248/21/PL).

As a local resident I can attest that vehicles regularly ignore signage at the north end of Dappers Lane, which they access often at speed, presenting risk to oncoming traffic and pedestrians including children. I see no reason why similar signage would be respected some few hundred yards further down the lane.

Common sense would suggest that an APNR camera would similarly be ignored, not least because local police, on their own recent admission and in connection with a proposed camera at the north of Dappers lane, do not have the necessary 'manpower' to monitor the images.

What is required is a mechanised barrier, as implied in application A/248/21/PL.

Please add your support to the proposal for a mechanised barrier and help keep our children and wildlife safe.

Yours sincerely,

Nick Taylor.

Angmering resident.
